

We know you take patient care seriously, and we do, too. With every hospital, health clinic, mental health and aged care facility, our approach is to deliver an integrated healthcare security solution that puts staff, consumers and patients at its core.

5 Challenges Caregivers Face

Compliance, Data breaches and Safety

Effective protection of patient data requires implementing access controls, encryption, staff training, regular audits, and compliance with privacy laws

Controlled Substances Oversight

Eliminate doubt by monitoring multiple areas from a single location and recording activities where controlled substances are accessible.

Theft & Asset Loss

Highly-trained professionals at our A1 graded monitoring network (SOC) provide prompt responses to triggered alarms and camera analytics, reducing the risk of theft.

Caregiver Protection

Highly-trained professionals at our A1 graded monitoring network (SOC) provide prompt responses to triggered alarms and camera analytics, reducing the risk of theft.

Outdated Infrastructure

Healthcare systems struggle with outdated tech, but integrated platforms streamline car parks, lifts, duress calls, and CCTV to enhance efficiency and response.

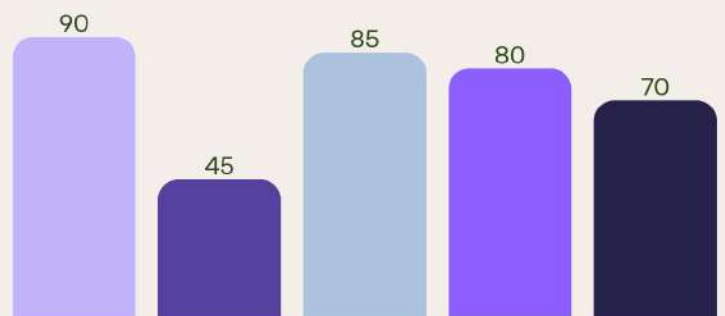

By the Numbers

Healthcare Security Risk Impact Score (HSRIS)

A composite score (0–100 scale) based on:

- Frequency of incidents
- Severity of impact (e.g., financial, operational, reputational)
- Public or workforce exposure
- Regulatory attention

- Compliance, Data Breaches & Safety**
 - 102 breaches (Jan–Jun 2024), highest industry; 90%+ PII; 67% malicious.
- Controlled Substances Oversight**
 - Australia's unintentional opioid deaths dropped 37% since 2018 via better oversight and monitoring
- Theft & Asset Loss**
 - Healthcare fraud costs Australia \$1.5–3B annually, including billing fraud, ID theft, and equipment misuse
- Caregiver Protection**
 - 75% of nurses and midwives report exposure to workplace violence, stress, or fatigue
- Outdated Infrastructure**
 - Australia's \$42B health pipeline (54 hospitals) faces delays from labor shortages and poor planning
